

SENIOR PRODUCT DESIGNER

Daniel C Townson

Almost a full decade at Under Armour designing experiences for MapMyFitness, MapMyRun & MyFitnessPal followed by a deep dive into design systems at Olympus. Currently building projects with AI-integrated workflows. Available for hire.

EXPERIENCE

Olympus | Sr Designer - Design Systems

Feb 2024 - April 2026 • Remote (Asheville, NC)

All-in-one endoscopic suite of software - schedule, treatment, recovery

OLYSENSE - Embedded design systems support for teams building endoscopic software products. Drove cross-team adoption of a shared component library and token-based design language, unifying up to 80% of existing interface elements across disparate products.

Under Armour | Sr. Digital Product Designer

July 2014 - July 2023 • Hybrid (Austin, TX)

Helping athletes at all levels hit their performance goals through data analysis and insights.

UA Baselayer Design System - Led the design and implementation of a design system for use on Under Armour fitness tracking apps. Component creation, variables, color systems, font families.

MapMyRun - Led design on social features, including photo editing and the public activity feed, as well as connected footwear integrations, MVP Premium subscriptions, website redesigns and data visualizations.

MyFitnessPal - Designed data viz for performance trends, including a performance insight system. Lead designer on Premium upsell initiatives that resulted in the highest-grossing yearly subscription revenue in MFP history. (\$10mil+)

Samsung Galaxy Watch Active 3 - Under Armour Edition - Partnered with Samsung to design and launch a co-branded digital watch pre-loaded with UA MapMyRun apps and features, including connected footwear integrations & real-time form coaching.

Garmin Data Fields - Designed custom data fields that pair with UA Connected Footwear to provide deeper running data and real-time form coaching on Garmin watches, increasing our engagement with Garmin users.

UA Record - Designed and launched a 24/7 health and fitness tracking app that aggregated data from multiple sources into an easy-to-read dashboard that provided actionable insights.

CanWe Studios | UX/UI Designer

March 2013 - June 2014 • Austin, TX

Connecting like-minded people for business opportunities.

CanWeNetwork - Lead designer for a mobile networking app that used LinkedIn profiles and real-time location data to connect people on a professional level during hyper-local events.
