SENIOR PRODUCT DESIGNER - DESIGN SYSTEMS

Daniel C Townson

Senior product designer with 15+ years leading design systems and complex, data-dense product experiences across regulated enterprise software and consumer-scale platforms. Sole designer driving design systems strategy at Olympus, building and governing a component library and token architecture adopted across a multi-product, regulated portfolio. Background spans enterprise governance to consumer data visualization, with hands-on experience designing AI-powered, non-deterministic interactions and integrating AI tools (Figma MCP, Claude, Cursor) into daily practice.

EXPERIENCE

Olympus | *Sr. Designer - Design Systems*

Feb 2024 - April 2026 • Remote (Asheville, NC)

Sole designer on the design systems team for OLYSENSE, Olympus's enterprise, regulated medical imaging and diagnostics software suite (assessment, treatment, recovery) used by clinical teams across multiple product lines - partnered with an embedded engineer to build and ship the system.

- **Design system ownership -** Owned all design decisions for a shared component library and token-based design language, built from the ground up - defining contribution standards, documentation, and adoption pathways for design and engineering across disparate product teams.
- **Cross-team adoption -** Drove adoption of the system across the product portfolio, unifying up to 80% of existing interface elements and reducing design-to-development inconsistency.
- **Engineering partnership -** Partnered with an embedded design systems engineer to translate token architecture (Style Dictionary) into implementation within a regulated software environment.

Under Armour | *Sr. Digital Product Designer*

July 2014 - July 2023 • Hybrid (Austin, TX)

Led design across Under Armour's connected fitness ecosystem, translating fragmented, multi-source athletic and health data into trustworthy, decision-ready interfaces at consumer scale.

- **UA Baselayer Design System -** Founded and led Under Armour's first cross-app design system - component architecture, token/variable structures, color systems, and typography - adopted across the MapMyFitness app portfolio, replacing ad hoc, product-by-product UI patterns and unifying apps under one brand.
- **MyFitnessPal -** Designed a performance-insight data visualization system translating raw fitness data into actionable trends; led design on Premium upsell initiatives that drove the highest-grossing subscription revenue year in MFP history ($10M+).
- **MapMyRun -** Led design across social, subscription (Premium), and data visualization surfaces, including connected-footwear integrations and website redesigns.
- **UA Record -** Designed and launched a 24/7 health-data aggregation dashboard, consolidating multiple data sources into a single, actionable view for user decision-making.
- **Samsung Galaxy Watch Active 3 (UA Edition) -** Partnered directly with Samsung's product team to design and launch a co-branded wearable, integrating real-time coaching and connected-footwear data across two companies' technical constraints.
- **Garmin Data Fields -** Designed custom data integrations enabling real-time coaching feedback within a third-party hardware ecosystem.

CanWe Studios | *UX/UI Designer*

March 2013 - June 2014 • Austin, TX

- **CanWeNetwork -** Lead designer for a location-aware professional networking app built on LinkedIn profile data.

INDEPENDENT PROJECTS

- **DriftAI -** Personal, field-validated project. Designing an offline-first, AI-powered fly-fishing advisor app; built and tested computer-vision features (FlyID: photograph-based fly identification) that surface confidence-scored, non-deterministic model output directly in the UI, including uncertainty and fallback states.

SKILLS

Design

- End-to-end product design
- Design systems & governance
- Figma - expert (components, variants, auto-layout, tokens)
- Token/variable architecture
- Interaction design
- WCAG / ADA accessibility

AI Workflows

- Figma MCP
- Claude
- Cursor

Technical

- HTML/CSS/JS
- Style Dictionary
- Azure DevOps
- Jira/Confluence
- Agile

Research

- User interviews
- Usability testing
- Competitive analysis
- A/B result analysis
- Funnel data review

Leadership

- Mentorship
- Design reviews
- Cross-functional teamwork
- Stakeholder communication
- Design strategy

EDUCATION

St Bonaventure University
MS Integrated Marketing Communications

SUNY Buffalo
BS Communication Design
